

## Missing designated items

In line with the Railway Heritage Act 1996, designated items remain in use by the railway industry until they are no longer required by the legal owner. As such, designated items are located around the country, some on moving vehicles, and are cared for by a variety of railway businesses.

While great care is taken by companies to track and look after their designated items, given the nature of working objects, items are occasionally misplaced. We are aware that the items in the attached list are missing. If you find any of these items please contact the Railway Heritage Registrar at the following address:
